

# Technical Data Sheet

## Starcoat PMMA Decorative Chips

**Starcoat PMMA Decorative Chips are especially designed to be used as a topping with Starcoat PMMA liquid waterproofing products. In addition to providing design options for the finished surface, they also enhance the non-slip properties of the waterproofing.**

### Material

Acrylate-based topping.

### Properties and advantages

Can be used as a single colour or multiple colours for a compatible resin product.

### Use

Starcoat PMMA Decorative Chips are applied to the Starcoat PMMA sealing layer to enhance the appearance of the finish as well as to optimize the non-slip properties of the surface.

A non-slip level of up to R10 can be achieved.

## Packaging

1 kg tub and 20 kg box.

## Colours

Black, white, grey.

## Coverage

Up to 50g/m<sup>2</sup> depending on desired appearance.

## Application

Equipment / tools	Hopper spray gun.
-------------------	-------------------

Use the hopper spray gun to apply Starcoat PMMA Decorative Chips to the sealer (finish) while the coating is still wet. Depending on the required design of the surface, the coloured chips can first be fixed and a greater or lesser amount applied. However, applying an excess quantity should be avoided, as in their final position the chips applied should not form a continuous coating at any point.

## General information

The above information, especially on product application, is based on extensive development work, experience and is provided to the best of our knowledge. However, the wide variety of requirements and conditions on site mean that it is necessary for the product to be tested to ensure that it is suitable for the intended purpose. Only the most recent version of the document is valid. We reserve the right to make changes to reflect advances in technology or improvements to our products. Axter Ltd makes no warranties, express or implied, as to the properties and performance under any variations from such conditions in actual construction.
